Skills Summary

Junior Data Engineer with experience in Azure data platforms, Microsoft Purview and Databricks integrations working with Agile methodologies. Background in SQL, Python and ETL/ELT concepts, with hands-on involvement in metadata management, data lineage and cloud-based data operations. Passionate about building scalable data pipelines, working with PySpark and developing modern data engineering solutions.

Data Engineering: SQL, Python, ETL / ELT, Data Modeling, Data Warehousing Concepts, Data Lineage, Data Cataloging, Delta Lake Concepts, Star Schema, Medallion Architecture, Data Governance

Cloud & Platforms: VS Code, SSMS, Git, Microsoft Azure, Microsoft Purview, Databricks

Experience

Junior Data Engineer, PeopleCert at Athens, Greece

2026 Jan – Present

- Participating in the implementation of Microsoft Purview integrations with Microsoft Fabric and Databricks to support enterprise metadata management and lineage tracking.
- Configuring and maintaining metadata scans across cloud data platforms to improve data discoverability and governance.
- Assisting in the design and documentation of enterprise data governance and metadata management solutions.
- Participated in ETL/ELT workflows and data transformation processes using Databricks.
- Worked with Databricks notebooks to support data ingestion and transformation activities.
- Contributing to internal Databricks ETL initiatives, utilizing PySpark, Spark SQL and Delta Tables for data transformation and analytics workloads.

Trainee & Graduate Fullstack Dev Bootcamp, PeopleCert at Athens

2025 Oct – 2025 Dec

- Gained hands-on experience in full-stack development, covering front-end, back-end, and database fundamentals.

Education

DEMOCRITUS UNIVERSITY OF THRACE, GREECE

BSc in Electrical Engineering

Certifications & Courses

Certifications: Data Engineer Associate – DataCamp| Software Development Skills C# Foundation - DevOps| Foundational C# - Microsoft

Courses: Data Transformation with Spark SQL in Databricks – DataCamp| Intermediate Python – DataCamp| Introduction to PySpark – DataCamp| Data Ingestion with Lakeflow Connect - Databricks| Academy Accreditation - Databricks Fundamentals| The Complete SQL Bootcamp (30 Hours) Udemy Courses| Azure Fundamentals AZ-900 Udemy Courses

Projects

[Maritime Traffic Intelligence Lakehouse](#) (Personal Project – In Development)

Building a scalable Maritime Intelligence Platform using Data Engineering, ETL/ELT Pipelines, Geospatial Analytics, Big Data Processing, Lakehouse Architecture and Business Intelligence to deliver insights from vessel tracking and shipping activity data.

[ActiVR SQL Project – DataCamp Project](#)

Built an end-to-end SQL analytics solution involving data modeling, transformation, aggregation and business reporting using complex SQL queries and analytical functions.

[Aris Thessaloniki Basketball Analytics](#) (Personal Project)

Built a sports analytics pipeline involving data ingestion, transformation and reporting, leveraging Python and SQL to analyze player and team performance metrics.
